Cooperation and simplification – Road map for fossil free construction

MARIANNE HEDBERG, THE SWEDISH CONSTRUCTION FEDERATION

Road map for fossil free and competitive construction sector

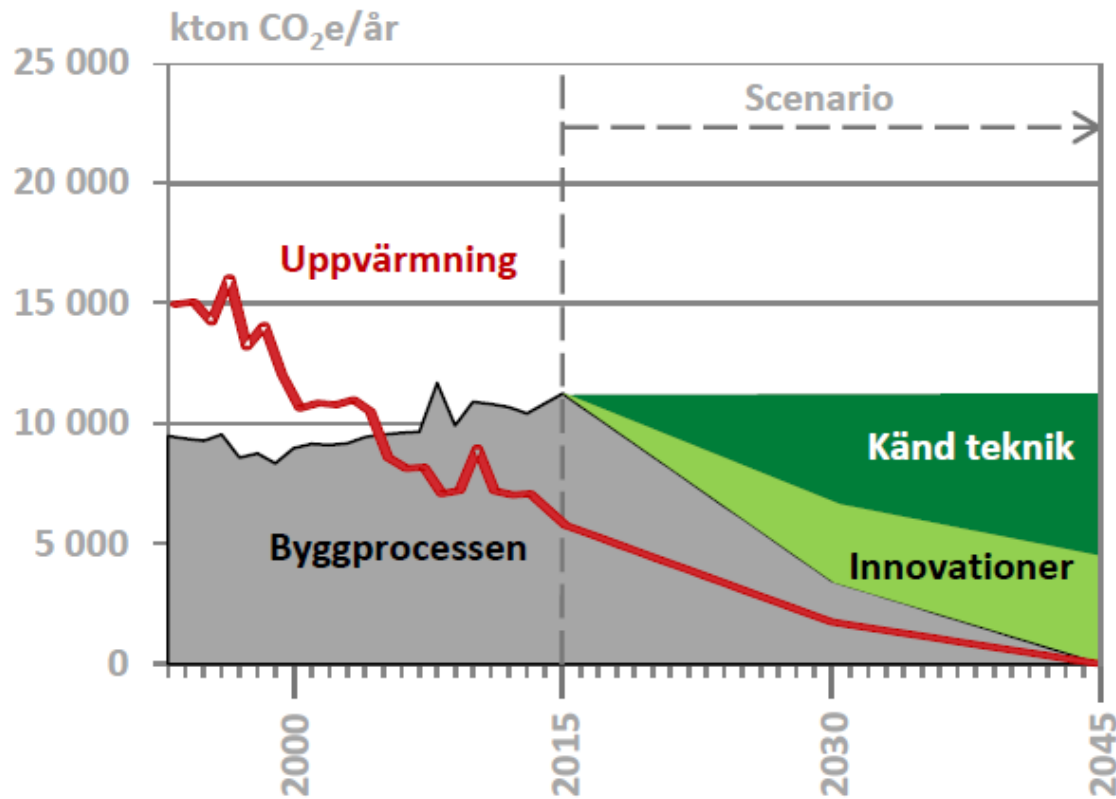

Goal

The goal is to gather the whole value chain in the construction sector around a common roadmap that will clarify how the sector's actors, decisionmakers and politicians can enable a shift to a climate-neutral and competitive society in Sweden.

Recommendations of actions to the Government

- Introduce ambitious, long-term and predictable legal requirements
- Utilise public procurement for climate neutral contracts
- Introduce Climate declaration for new buildings
- Change the regulation for the classification for waste (to drive circularity)

Emissions of greenhouse gases from the construction sector

Now we move on!

70 companies and organisations have signed...

...and more
companies are
knocking on the
door to join!

Together on the road to a climate neutral construction sector

Top five!

- Procurement – both public and private
- Measurement, follow-up and inspection
- Planning early in the process (architects and consultants)
- Education activities – “certificate in sustainable building”
- Lobbying

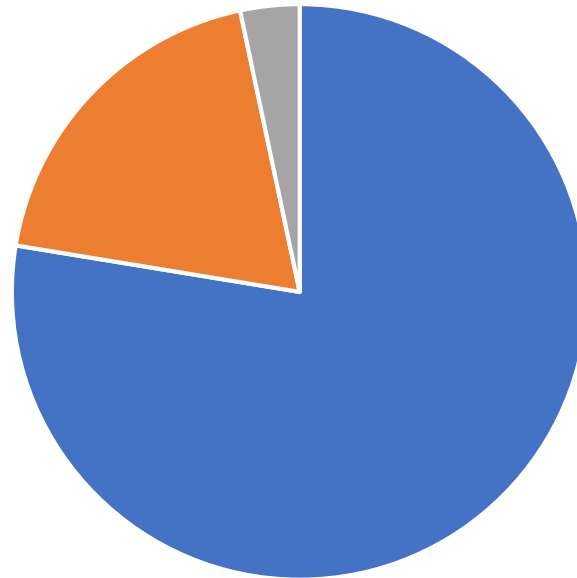

Walk the talk!

- The Swedish Construction Federation coordinates
- Gather the whole value chain
- Widen the scope to a holistic view
- Inspire creativity to develop projects together
- Identify challenges and possibilities
- Communication and lobbying
- NOT a project – a working model from now on

Challenge – many small companies

Number of employees within the Swedish Construction Federation

■ < 25 employees ■ 25 to 100 employees ■ > 100 employees

We are in it together....
